Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 January 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 5, 6, 8, 10, 11, 13-15, 19, 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Lind. The patent to Lind teaches structure as claimed including two decks (12, 14) having rows of lugs (16), each lug having mating areas including alternating recesses(32) and projections (36), two latches on each lug defined by tabs (46) having a receiving face and the lips (40) having a shoulder portion providing engagement portions that are not coplanar with each other but coplanar with engagement portions of other lugs. The surfaces (38) are considered angled. The expression "complementary" defines a structure that is part of another part and does not add a limitation that any structure is "identical" or the same. In regard to the limitation "on opposed sides thereof", structures on opposed sides of any engagement structure reads thereon.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1, 3, 7, 9, 11, 12, 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lind in view of Apps. The patent to Lind teaches structure substantially as claimed, as discussed above including first and second deck with recesses engaging projections the only difference being that the engaging portions are not tapered. However, the patent to Apps(14, 12, 18, 54, 50, 52) teaches the use of tapered engagement structure. It would have been obvious at the time of the invention to modify the structure of Lind to include tapered engagement portions, as taught by Apps since such structures are conventional alternative structures used for the same intended purpose of providing an interlock thereby providing structure as claimed.
